

CITY OF INDIANAPOLIS CAPITAL IMPROVEMENT PROGRAM PROJECTS (2005-2009)

The City of Indianapolis has a significant need for improved neighborhood streets, sidewalks, curbs and other infrastructure. In the last five years, City officials have made progress correcting sewer overflows and backups, neighborhood flooding, failing septic systems and crumbling streets, sidewalks and curbs.

The map above displays the locations of projects completed from 2005 to 2009, including Septic Tank Elimination Program (STEP), storm sewer, sanitary sewer, advanced wastewater treatment plant, street, sidewalk and curb projects.
